

CONTROLLER APPS

ALL THE MUSIC YOU LOVE EASIER THAN EVER

SONOS

CONTROLLER APP BENEFITS

YOUR MUSIC, UNITED

Sonos stands alone with its single app to unify your entire music library, Internet radio and favorite music services. Seamlessly access more than 100,000 free Internet radio stations, podcasts and shows from your area and around the world, all from one easy to use control panel.

EXPERIENCE UNIVERSAL CONTROL

Take control of your Sonos Wireless HiFi System with the smartphone, tablet, desktop or laptop you already own. Simply download the free app from the Amazon Appstore, Google Play™, iTunes® App Store, or directly from Sonos using your Mac or PC. And since Sonos can handle multiple controllers --Android™, iOS, Mac® or PC --at the same time, everyone in the house can control their music.

SEARCH, BROWSE, PLAY

Quickly find artists, albums, songs and stations from your music library, Internet radio and music services. Effortlessly create playlists from all your music sources, right in the app. Drag and drop songs into different rooms to turn the whole house into a concert, or pick your songs and control the volume for every room separately.

ALWAYS WITHIN REACH

Slide your smartphone from your pocket, grab your tablet, or open your laptop and start playing music. Control all your music from whatever device is closest at hand. And, when your smartphone is the controller, the music won't stop when a text or call comes in.
